ZDAS SGS GmbH was founded as a trading company for the metallurgical products of ŽĐAS, a.s. in 1993. Since that time, forgings and castings according to customers' drawings, patterns for other casting shops and forged bars and ingots have been sold by ZDAS SGS mainly at the German market, but also in other countries like the U.S.A., Netherlands, France, Romania, etc.

The most important customers come of the shipbuilding industry, metal scrap processing equipment and power industry manufacturers.

Since 1999, ZDAS SGS has also traded with steel products by other European suppliers. The company opened an office in Prague in the year 2000. Now, the range of products comprises bright bars in all steel grades, round, flat and square dimensions as well as rolled and forged bars.

More than 10 000 tons of steel bars according to the customer's requirements are ordered from the partner suppliers every year.

The long-term business relationship between the customers and the company as well as the very dynamical development of ZDAS SGS have been based on the long experience in the steel business and on the company's mission to work daily on the customers' satisfaction and provide them with the complete commercial and service support.
